1.0 Executive Summary

1.1 Overview
The Maryland State Arts Council (MSAC) sought a report detailing the economic and fiscal impacts of the 22 Maryland Arts and Entertainment Districts (A&E districts) in existence during the study period, fiscal year (FY) 2014, on Maryland’s economy. As one of the first states to develop this designation, Maryland’s A&E districts serve as a case study and leading example for other states. Other states have since created similar designations based on Maryland’s program.

To achieve the project objective, the Regional Economic Studies Institute (RESI) of Towson University conducted an economic and fiscal impact analysis. To quantify the economic and fiscal impact of the A&E districts, RESI used the IMPLAN input/output model. For more information regarding IMPLAN and RESI’s methodology (assumptions, exclusions, etc.), please refer to Appendix A. A glossary of terms can be found in Appendix B.

This analysis answers the following questions:
1. How many direct, indirect, and induced jobs have the districts created?
2. How much direct, indirect, and induced state GDP have the districts generated?
3. How much in tax revenues have the districts generated for the State of Maryland?

1.2 Summary of Findings
Below are RESI’s key findings in regard to the economic and fiscal impacts of the A&E districts for FY 2014.¹

Economic Impacts
• The A&E districts’ operations supported an estimated 6,000 direct, indirect, and induced jobs during the period.
  o Approximately 1,211 of these jobs were generated by new businesses formed within A&E districts’ boundaries during the period.
  o The other 4,766 jobs were supported by visitor spending at events supported by the A&E districts during the period.
• Nearly $571.4 million in total state GDP were supported by the A&E districts during the period.
  o Approximately $136.9 million were generated by new businesses formed within A&E districts’ boundaries during the period.
  o The other $434.4 million were supported by visitor spending at events supported by the A&E districts during the period.
• More than $198.5 million in total wages were supported by the A&E districts during the period.

¹ While this analysis takes into account as many variables as possible, it is important to note that a number of assumptions and exclusions were made as a result of missing data and other factors.
Maryland Arts and Entertainment Districts Impact Analysis FY 2014
RESI of Towson University

- Approximately $50.1 million were generated by new businesses formed within A&E districts’ boundaries during the period.
- The other $148.4 million were supported by visitor spending at events supported by the A&E districts during the period.

Fiscal Impacts
- New businesses formed within A&E districts’ boundaries during the study period generated nearly $7.9 million in tax revenues.\(^2\)
- Visitor spending at events supported by the A&E districts supported more than $30.6 million in tax revenues during the study period.
- The total tax revenue impact of the A&E districts came to approximately $38.5 million during the study period.

---

\(^2\) Total tax revenues refer to property, income, sales, payroll, and other tax revenues supported on the state and local levels.
2.0 Introduction
The Maryland State Arts Council (MSAC) sought a report detailing the economic and fiscal impacts of the 22 Maryland Arts and Entertainment Districts (A&E districts) in existence during the study period, fiscal year (FY) 2014, on Maryland’s economy. As one of the first states to develop this designation, Maryland’s A&E districts serve as a case study and leading example for other states. Other states have since created similar designations based on Maryland’s program.

To achieve the project objective, the Regional Economic Studies Institute (RESI) of Towson University estimated job creation, state GDP (also referred to as output), and wages attributable to the A&E districts in 2014. These results were broken down by type of impact (direct, indirect, and induced). RESI also estimated the fiscal impacts associated with the program. Fiscal impacts were then compared against estimated tax revenue losses associated with the tax incentives available to and used by districts. The project team considered grants where applicable.

This analysis answers the following questions:
1. How many direct, indirect, and induced jobs have the districts created?
2. How much direct, indirect, and induced state GDP has the project generated?
3. How much in tax revenues have the districts generated for the State of Maryland?

To quantify the economic and fiscal impact of the project, RESI used the IMPLAN input/output model. For more information regarding IMPLAN, please refer to Appendix A.

3.0 Findings
3.1 Economic Impacts
To determine the economic impacts, RESI used A&E district application materials and annual reports provided by MSAC. For a list of the annual report data provided, please refer to Appendix A. A summary of the total economic impacts generated by both new businesses and supported by visitor spending at events supported by the A&E districts can be found in Figure 1.

---

3 For definitions of terms, please refer to Appendix B.

Sources: IMPLAN, RESI

According to RESI’s analysis, the A&E districts collectively supported approximately 6,000 jobs and have generated nearly $571.4 million and $198.5 million in state GDP and wages, respectively, during FY 2014 based on provided data.

The direct, indirect, induced, and total economic impacts broken out by source (new businesses and event spending) can be found in Figures 2 through 4. For information regarding RESI’s methodology, please refer to Appendix A. Please note that direct employment figures associated with event spending throughout the report refer to the jobs supported by event attendees’ spending money outside a given event but within the A&E district for the duration of the event. For more information regarding RESI’s assumptions, please refer to Section A.2 in Appendix A.

---

*Summed figures throughout the report may not add up exactly to totals due to rounding.*

Sources: IMPLAN, RESI
Previous studies have yielded results comparable to RESI’s findings. For a summary of results from past impact analyses, please refer to Section 4.0.5

3.2 Fiscal Impacts
RESI also estimated the fiscal impacts associated with the A&E districts. The fiscal impacts of the A&E districts can be found in Figure 5. Input data were provided in application materials and annual reports provided by MSAC.

Fiscal impacts—specifically, property tax revenues—would traditionally be compared against estimated tax revenue losses associated with the property tax incentives available to and used by A&E districts. Data from the A&E district annual reports did indicate that one property submitted applications for the tax incentive, but neither the annual reports nor information from the State Department of Assessments and Taxation indicated that this application was approved. As a result, RESI omitted this consideration for the analysis. For more information regarding RESI’s reasoning, please refer to Appendix A.

---

5 Data may not available for every report and every category of interest as impact analyses vary in terms of objective and methodology.

4.0 Literature Review

RESI analyzed findings from similar studies conducted for comparable programs and/or designations. Across the nation, there has been an increased interest in establishing arts, culture, and entertainment districts. According to the National Assembly of State Arts Agencies, twelve states had “established 156 unique cultural districts across the country” as of 2012.6 In addition to Maryland, Arkansas, Colorado, Indiana, Iowa, Kentucky, Louisiana, Massachusetts, New Mexico, Rhode Island, Texas, and West Virginia have cultural or similar district designations.7 Since 2012, Oklahoma and South Carolina have also established cultural districts.8

Americans for the Arts, a nonprofit organization, focuses on promoting and advancing the arts in the United States.9 In recent years, American for the Arts has performed extensive research into the economic impacts of the nonprofit arts and culture industry on both individual states and the United States as a whole.10 Most recently, in 2012, Americans for the Arts released the Arts & Economic Prosperity IV summary report, the fourth in its series.11 This report details the economic and fiscal impacts of the nonprofit arts and cultural industry in 2010 at a national, state, and, in some cases, regional level.

Nationally, the 2010 economic impact of the nonprofit arts and culture industry was determined to have generated $135.2 billion in total direct expenditures, supported 4.1 million full-time equivalent jobs, and to have generated $86.7 billion in resident household income, $12.7 billion in local and state government income, and $9.6 billion in federal tax revenue.12 In late 2013, the U.S. Bureau of Economic Analysis and the National Endowment for the Arts announced that in arts and cultural production accounted for 3.2 percent of total gross domestic product in 2011—a total of more than $500 billion.13 Arts and cultural production has

---

8 Ibid.
12 Ibid, 3.
consistently accounted for 3.2 to 3.7 percent of total gross domestic product for more than a decade.\textsuperscript{14}

Even more impressive than the vast national impacts of the nonprofit arts and cultural industry are the impacts the industry has on individual regions and states. While the \textit{Arts \& Economic Prosperity IV} summary report detailed statewide impacts, several states have released independent studies regarding the state-level economic impacts of the arts since the last Americans for the Arts release. RESI compiled a sample of state reports for comparison purposes. A summary of these impacts can be found in Figure 6.

Source: Various\textsuperscript{16}

At present, initial reported figures regarding impacts associated with arts, culture, and entertainment industries may not be as specific and in depth as needed to compare directly to RESI’s analysis. For example, \textit{Arts and Economic Prosperity IV} considered only the direct industry expenditures to determine the economic impacts, whereas RESI considers event-related spending and business openings and closings when determining the economic impacts. Additionally, definitions of the industry may vary—whether referred to as the “arts industry,” “cultural industry,” or “creative industry.” While there are limitations associated with comparing other research with RESI’s findings, this comparison can serve as a starting point for consideration. As more and more A&E districts and similar designations are created, more research and analysis regarding the specific economic impacts associated with such designations and/or programs will become available.

\textbf{5.0 Conclusion}

The existence of cultural districts has a positive impact on the local economy. In the case of Maryland’s A&E districts, operations supported an estimated total of 6,000 jobs during FY 2014.

\textsuperscript{15} Sources presented in the literature review mainly reported employment and other impact figures. RESI generally reports employment, state GDP, and wage impact figures. For more information regarding IMPLAN and its output, please refer to Appendix A.
\textsuperscript{16} For a full list of the references used, please refer to Section 6.0.
Approximately 1,211 of these jobs were generated by new businesses; the remaining 4,766 jobs were supported by visitor spending at events. In addition, nearly $571.4 million in total state GDP were supported by the A&E districts during the period—$136.9 million by new businesses and $434.4 million by visitor spending. Moreover, total wages of more than $198.5 million were supported by the A&E districts during the period. Approximately $50.1 million in wages were generated by new businesses and $148.4 million were supported by visitor spending at events.

New businesses formed within the A&E districts’ boundaries during the study period generated nearly $7.9 million in state and local tax revenues.\(^{17}\) Visitor spending at events supported by the A&E districts supported more than $30.6 million in state and local tax revenues. The total tax revenue impact of the A&E districts came to approximately $38.5 million during the study period. As a result of approved property tax incentive applications, the total net property tax revenue for the average A&E district property would be less than the estimated generated property taxes provided when exemptions are taken into consideration.

\(^{17}\) Total tax revenues refer to property, income, sales, payroll, and other tax revenues supported on the state and local level.

Maryland Arts and Entertainment Districts Impact Analysis FY 2014
RESI of Towson University

Appendix A—Methodology

A.1 IMPLAN Model Overview

To quantify the economic and fiscal impacts of the A&E districts on Maryland, RESI utilized the IMPLAN input/output model. This model enumerates the employment and fiscal impact of each dollar earned and spent by the following: employees of the district, other supporting vendors (business services, retail, etc.), each dollar spent by these vendors on other firms and each dollar spent by the households’ employees, other vendors' employees, and other businesses' employees.

Economists measure three types of economic impacts: direct, indirect, and induced impacts. The direct economic effects are generated as the districts create jobs and hires workers to support the district activities. The indirect economic impacts occur as the vendors purchase goods and services from other firms. In either case the increases in employment generate an increase in household income, as new job opportunities are created and income levels rise. This drives the induced economic impacts that result from households increasing their purchases at local businesses.

Consider the following example. A new firm opens in a region and directly employs 100 workers. The firm purchases supplies, both from outside the region as well as from local suppliers, which leads to increased business for local firms, thereby hypothetically creating jobs for another 100 workers. This is called the indirect effect. The workers at the firm and at suppliers spend their income mostly in the local area, hypothetically creating jobs for another 50 workers. This is the induced effect. The direct, indirect and induced effects add up to 250 jobs created from the original 100 jobs. Thus, in terms of employment, the total economic impact of the firm in our example is 250.\(^\text{18}\)

A.2 Input Assumptions

The project team extracted all useable data from A&E district application materials, annual reports, and relevant county tax ordinances. In addition, RESI made assumptions regarding A&E district operations where actual data were not available.

Economic impacts were determined based on two main factors: (1) estimated new direct employment occurring after A&E district designation as the attraction of new firms could primarily be attributed to the designation and (2) estimated spending at events for which attendance was provided. For the most part, this information was provided by the A&E districts. However, in some cases, these data were not provided in the annual reports. RESI researched figures for square footage per employee and spending for different event types from past studies to estimate these inputs.

---

\(^{18}\) Total economic impact is defined as the sum of direct, indirect, and induced effects.
In cases of missing building data, RESI used proxy estimators in regard to size of businesses and commercial real estate based on application data. Historical buildings at times may be exempt from zoning restrictions due to size or being “grandfathered” into clauses in current legislation. The project team used average square footage as some businesses have a larger space than those that have originated in the last 20 to 30 years. The project team then used these square footage estimates and applied them to research regarding average square footage per employee to determine estimated direct employment where the data were not provided. Square footage, when reported by A&E districts, refers to the enclosed square footage of the buildings in the A&E districts. In cases where square footage was not reported, gross square footage was calculated from property records. Using floor area ratio (FAR) estimates based on the population of an area, the project team calculated the maximum enclosed square footage possible. Enclosed square footage for districts missing this data was defined as gross square footage multiplied by FAR estimates.  

To determine event spending inputs, RESI researched comparable events and the associated visitor spending figures and attendance to determine percentage spending levels for hotels, transportation, food and beverage, retail, entertainment, and other spending. Where districts did not provide attendance levels for events, attendance was estimated. In these cases, event attendance was estimated based on average attendance for similar events. A summary of the findings from RESI’s literature review can be found in Figure 7.

RESI determined fiscal impacts primarily based on district responses provided in the annual reports. The project team cross-referenced responses to questions regarding property tax credits in the annual reports with information available from the State Department of Assessment and Taxation (SDAT)’s online property database. The property that reported as applying for a property tax credit on the annual reports from FY 2014 did not receive the A&E tax credit per the project team’s research within SDAT’s database. RESI did not assume that all such applications were approved as this would likely overstate the impacts of property tax credits in the A&E districts, therefore understating the fiscal impacts.

A.3 Modeling Assumptions
RESI analyzed IMPLAN industry sectors based on application materials and annual reports provided by MSAC. The specific IMPLAN industry sectors used for the A&E districts can be found in Figure 8.

RESI made assumptions regarding the applicable industry codes in cases where districts did not provide specific property use data. All A&E districts were analyzed using an IMPLAN model built from state-level data for Maryland. For the most accurate and in-depth analysis of separate A&E districts, county-level data would be required.

### A.4 Exclusions
The project team estimated economic impacts primarily using new commercial employment and all event spending. Existing businesses were not included in the analysis due to the difficulty in determining if these businesses had been formed as a direct result of the A&E district designation or if these businesses had been formed as a result of some other factor(s). If Regional Economic Studies Institute
the analysis included the impacts of businesses falling under the latter case, the findings would likely be overstated.

Due to the difficulty in determining if A&E district enterprises had been formed as a direct result of the A&E district designation or if these businesses had been formed as a result of some other factor(s), attendance data for A&E district enterprises was excluded. To avoid overstating the impact of property tax exemptions and therefore understating the fiscal impacts of the A&E districts, RESI excluded property tax exemptions, as no applications were shown to be approved when cross-referenced with SDAT’s database.

Other A&E district operations that would contribute to positive economic impact were excluded in the analysis due to data gaps. Such factors include the new art sales for artists and galleries, ticket/entry expenditures for arts enterprises, rental income from artists’ space, and awarded grants. These were not included in the analysis for a variety of reasons including but not limited to lack of data.

Due to the limitations in this study, RESI recommends that MSAC consider the following for the next designation period:

- Require uniform building inventories, including address, zoning type, square footage, land area, last sale date, last sale value, assessment value, age of building, and other pertinent details.
- Require detailed building data for new businesses in annual reports.
- Require detailed employment data for new and closing businesses in annual report.
- Require detailed enterprise and event data, including name, address, attendance, and ticket sales (where applicable), in annual reports.

A.5 Limitations of the Data Provided
A&E districts are expected to complete annual reports to provide information regarding goals, accomplishments, new establishments, events and promotions, attendance figures, and awards and grants for the fiscal year. These reports were provided by MSAC and cover FY 2014. All A&E districts submitted reports for this period.

While each A&E district received identically formatted questions, not all reports were completed in the same way. For instance, all of the A&E districts did not provide a response for every question. In most cases, these differences did not require RESI to make additional assumptions.

The use of an updated, standardized survey tool would help in improving uniformity of responses across A&E districts, allowing for increased analytical precision.
Appendix B—Glossary

A glossary of economic and fiscal impact terminology frequently used throughout this report can be found in Figure 9.

Figure 9: Glossary of Terms

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economic Impact</td>
<td>This term refers to the changes in the economy resulting from an event. RESI typically reports employment, state GDP/output, and wage impacts.</td>
</tr>
<tr>
<td>Employment</td>
<td>This term refers to the number of new full-time equivalent (FTE) jobs created as a result of district activity which has been modeled in IMPLAN.</td>
</tr>
<tr>
<td>Fiscal Impact</td>
<td>This term refers to the change in tax revenues resulting from an event. RESI typically reports state and local tax revenues, which are combined in IMPLAN.</td>
</tr>
<tr>
<td>IMPLAN</td>
<td>This term refers to the input/output modeling software used to model changes in the economy in a particular region. The user builds a model based on prepackaged economic data from IMPLAN (typically at the state or county level), then enters input figures—an industry change of employment or sales, a household change of income, and/or several other input types—for the industry sectors expected to be impacted as a “scenario.” IMPLAN runs the scenario created in the model and produces the economic and fiscal outputs.</td>
</tr>
<tr>
<td>New Businesses</td>
<td>This term refers to all of the businesses which were newly created within an A&amp;E district during the study period according to data provided in the A&amp;E district annual reports. These businesses may include both for-profit and nonprofit entities. The number of for-profit and nonprofit businesses cannot be precisely determined from the data provided.</td>
</tr>
<tr>
<td>Output</td>
<td>This term refers to the economic activity created as a result of district activity which has been modeled in IMPLAN. It is synonymous with “state GDP.” In other words, it is the market value of all goods and services produced by the economy of the region being modeled.</td>
</tr>
<tr>
<td>State GDP</td>
<td>This term refers to the change in market value of all goods and services produced by the economy of the region which has been modeled in IMPLAN. It is synonymous with “output.”</td>
</tr>
<tr>
<td>Wage Impact</td>
<td>This term refers to the change in employee compensation (including all salaries and wages) associated with the job and state GDP/output creation resulting from district activity which has been modeled in IMPLAN.</td>
</tr>

**TOWSON UNIVERSITY**
Please answer all questions adhering to word limits.

SECTION I: DISTRICT ACCOMPLISHMENTS DURING FY 2014

In SECTION I, please identify only the new initiatives, events, festivals, projects, or enterprises during FY 2014.

Accomplishments may include, but are not limited to, new initiatives undertaken by district management (programming or administrative), new events, new festivals, new public art projects, new capital projects, new retailers, new businesses, new restaurants, and/or organizations newly located in the district.

A. Provide a narrative overview. (750 words or less)

B. How many new initiatives were undertaken by district management during FY 2014? If none use 0. If yes, list each separately. (500 words or less)

C. How many new events occurred in the district during FY 2014? If none use 0. If yes, list each separately. Indicate which were arts events. (New events that are presented by organizations or enterprises other than the management of the A&E district should also be included but it must be a new public event. For example, ABC Arts Organization presents a new Halloween Lantern Parade that takes place in the district.)

D. How many new festivals occurred in the district during FY 2014? If none use 0. If yes, list each separately. Indicate which were arts festivals. (New festivals that are presented by organizations or enterprises other than the management of the A&E district should also be included but it must be a new public festival. For example, ABC Community Organization presents a new holiday festival of trees that takes place in the district.)

E. How many new public art projects were initiated or completed in the district during FY 2014? If none use 0. If yes, list the name/location of each separately and indicate if the project is complete. (New public art projects that are produced by organizations or enterprises other than the management of the A&E district should be included.)

F. How many new capital projects were initiated or completed in the district during FY 2014? If none use 0. If yes, list the name/address of each separately and indicate if the project is complete. (New capital projects that are undertaken by organizations or enterprises other than the management of the A&E district should also be included.)

G. How many new retailers opened in the district during FY 2014? If none use 0. If yes, list each separately and indicate the number of full/part time jobs gained.

H. How many new businesses opened in the district during FY 2014? If none use 0. If yes, list each separately and indicate the number of full/part time jobs gained:
Maryland Arts and Entertainment Districts Impact Analysis FY 2014
RESI of Towson University

I. How many new restaurants opened in the district during FY 2014? If none use 0. If yes, list each separately and indicate the number of full/part time jobs gained:

J. How many organizations newly located in the district during FY 2014? If none use 0. If yes, list each separately and indicate the number of full/part time jobs gained:

SECTION II: CLOSINGS

In SECTION II, identify only the enterprises that closed during FY 2014.

A. How many retailers closed in the district during FY 2014? If none use 0. If yes, list each separately and indicate the number of full/part time jobs lost:

B. How many businesses closed in the district during FY 2014? If none use 0. If yes, list each separately and indicate the number of full/part time jobs lost:

C. How many restaurants closed in the district during FY 2014? If none use 0. If yes, list the name of each separately and indicate the number of full/part time jobs lost:

D. How many organizations closed or locate outside the district during FY 2014? If none use 0. If yes, list each separately and indicate the number of full/part time jobs lost:

SECTION III: FY 2013 CHALLENGES/SUCCESSES

A. Describe any challenges or issues encountered in the past year. Include the following if applicable: Technology, Administrative, Funding, and/or Other. Indicate if resolved or not. (500 words or less)

B. Describe any successes or innovations that took place during FY2014. Include the following if applicable: Technology, Administrative, Funding, and/or Other. (500 word or less)

SECTION IV: DISTRICT EVENTS AND FESTIVALS during FY2014 – LIST ALL THAT OCCURRED

A. Names of Events Date/s Total Estimated Attendance
(Events that are presented by organizations or enterprises other than the management of the A&E district should also be included but it must be a public event. For example, ABC Arts Organization holds a Halloween Lantern Parade that takes place in the district.)

B. Names of Festivals Date/s Total Estimated Attendance
(Festivals that are presented by organizations or enterprises other than the management of the A&E district should also be included but it must be a public festival. For example, ABC Community Organization holds a holiday festival of trees that takes place in the district.)
SECTION V: DISTRICT ASSETS

A. DISTRICT ARTS AND ENTERTAINMENT ENTERPRISES – LIST ALL
For those organizations that perform, exhibit, or provide services outside of the district, only include attendance that occurs within the district under Total Estimated Annual Attendance.

<table>
<thead>
<tr>
<th>Type of Enterprise</th>
<th>Names</th>
<th>Total Annual Attendance of Each</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of Galleries/Co-ops:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Number of Performance Venues:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Number of Museums:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Number of Arts Organizations:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Number of Arts Education Organizations:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Number of Public Art Pieces:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Number of Art Suppliers/Services:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other:</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

B. ARTIST HOUSING
Please list in this format:

<table>
<thead>
<tr>
<th>Name</th>
<th>Number of Units</th>
<th>Developer</th>
</tr>
</thead>
</table>

C. OCCUPANCY RATE
Mixed Use is defined as a combination of residential, commercial, industrial, office, institutional, or other land uses on the same site.

Estimate the Occupancy Rate for each during FY 2013:

- Storefront/Commercial: ________ % □ N/A
- Residential (live/work): ________ % □ N/A
- Industrial/Manufacturing: ________ % □ N/A
- Mixed Use: ________ % □ N/A

Estimate the Occupancy Rate for each during FY 2014:

- Storefront/Commercial: ________ % □ N/A
- Residential (live/work): ________ % □ N/A
- Industrial/Manufacturing: ________ % □ N/A
- Mixed Use: ________ % □ N/A

SECTION VI: DISTRICT BENEFIT INFORMATION

A. If the district maintains an artist registry, answer the following:
- What is the total number of registered artists working in the district?
- Of those, what is the total number of new artists registered in FY 2014?
- Estimate the number of artists working in the district that are not registered.
Maryland Arts and Entertainment Districts Impact Analysis FY 2014
RESI of Towson University

B. If the district does not maintain an artist registry, estimate the number of artists working in the district.

C. If the district has an artist relocation program, provide the number of artists relocating to the district during FY 2014 as a result of the program.

D. How many businesses in the district are eligible for an abatement of the Admission and Amusement Tax?
If applicable, list each:

E. How many property tax credits were applied for during FY 2014?
If applicable, list each developer:

F. Other than the state tax incentives, list all additional incentives provided by city/county.

G. Communication tools: check all that apply.
   - Facebook
   - Twitter
   - Website
   - Media page
   - On-line events calendar
   - Artist registry
   - Other – specify:

SECTION VII: PUBLIC FUNDING

A. Indicate any federal or national funding applications/awards/grants during FY 2014:

<table>
<thead>
<tr>
<th>ENTITY</th>
<th>APPLICATION SUBMITTED</th>
<th>AWARD/GRANT AMOUNT</th>
</tr>
</thead>
<tbody>
<tr>
<td>National Endowment for the Arts</td>
<td>Yes</td>
<td>$ __________________</td>
</tr>
<tr>
<td>National Trust for Historic Preservation</td>

<tr>
<td></td>
<td>$</td>
</tr>
</tbody>
</table>

SECTION VIII: FY 2014 (JULY 1, 2014 – JUNE 30, 2014) GOALS AND WORK PLAN

A. Identify your district’s FY 2014 goals. (500 words or less)

B. Summarize your district’s FY 2014 work plan to achieve these goals. (500 words or less)

SECTION IX: MSAC TECHNICAL ASSISTANCE

A. What type of technical assistance would serve to strengthen your A&E District? (500 words or less) E.g., Board Development, Financial Management, Fundraising, Funding Opportunities, Other

SECTION X. CERTIFICATION

The A&E District Representative agrees to complete and submit this application by electronic means, including the use of an electronic signature.

Name

Title

Date

☐ Checking this box verifies that the name typed above is authorized to sign this Maryland State Arts Council A&E Districts Annual Report on behalf of the A&E District and certifies that all information contained in this report is true and accurate to the best of the signatory’s knowledge. Checking this box
verifies that the applicant agrees to complete and submit this report by electronic means, including the use of an electronic signature.
Appendix D—A&E District Websites

For reference purposes, the counties and websites for each A&E district (where available) can be found in Figure 10.
